

Engagement & Governance Kit

Rules of Engagement (RoE)

Client: Smith & Associates, LLP

Consultant: Governance & Risk Consultant

Engagement Window: _____

1. Scope of Work (In-Bounds)

- External IPs: 198.51.100.10–198.51.100.30
- Internal Subnet: 10.20.30.0/24
- Domains: www.smithassociates-law.com, portal.smithassociates-law.com
- Out-of-Scope: HR systems, payroll, personal devices, third-party services.

2. Allowed Methods

- Passive recon (DNS, WHOIS, OSINT)
- Non-intrusive vulnerability scanning
- Internal scanning (credentialed/uncredentialed)
- Controlled exploitation of confirmed vulnerabilities
- Privilege escalation on in-scope hosts

3. Forbidden Methods

- DoS/DDoS
- Social engineering
- Physical intrusion
- Malware or destructive payloads
- Attacks on non-client or vendor systems

4. Data Handling

- Stop testing and notify client if sensitive data is found
- Encrypt evidence (AES-256)
- Limit access to authorized personnel
- Delete testing artifacts within 7 days

5. Reporting

- Daily updates to IT Director
- Critical findings within 1 hour
- Final report within 5 business days

6. Legal Notes

- RoE serves as authorization under CFAA and RCW 9A.90
- Client indemnifies tester for unintentional disruption within scope

Permission to Test (PTT)

To Whom It May Concern:

Smith & Associates, LLP authorizes [Consultant Name] to perform a controlled penetration test on the systems listed in the attached RoE.

Authorized Activities

- Scanning, probing, and testing in-scope systems
- Controlled exploitation for validation
- Internal access required to identify vulnerabilities

Identification

The consultant may present this letter and a government-issued ID as proof of authorization.

Liability

The client acknowledges inherent testing risks and agrees to indemnify the consultant for accidental outages or disruptions occurring within the approved scope.
